Profile

As a graduate in multimedia, I have acquired knowledge and skills that enable me to be efficient and organized. Programming video games and websites are my primary interests, and I thrive on challenges within these domains. I learn quickly and adapt easily to unexpected situations thanks to my patience and resourcefulness.

Interests

I appreciate creative expression in various forms, particularly in music, photography, and painting.

Technology is a subject that is constantly changing nowadays, and I enjoy staying updated on its evolution.
